Grapevine Specialists
General Nurserymen

Buy by Mail FROM MILLER'S CATALOG . .

you'll get only highest quality, hardy Northern-grown stock!

We wish to thank our many customers for the valued orders received in the past. To the many new customers who buy from us each year, we want to say that every effort will be made to satisfy your individual requirements. Our business is based on fair dealing to all, and no transaction is considered complete unless the customer is satisfied. . . . This year in addition to grapevines we are offering a complete list of high quality, true-to-name fruit trees. Also a fine collection of hardy popular shrubs. . . . Our hardy Northern-grown stock is unexcelled in quality. The past season has been most favorable for the growth of our nursery stock . . . and we have thousands of plants full of vigor and vitality for spring planting. Every plant is graded to a high standard. You can buy Miller's dependable plants with confidence. Every tree and plant sold is guaranteed to be true-to-name.

FRIENDLY SUGGESTIONS ON HOW TO ORDER

ORDER EARLY—By ordering early you enable us to complete most of our clerical work before our rush season arrives. You can also save money by taking advantage of our liberal discounts. We have a fine stock of all varieties now but as our season advances the supply of some plants may be exhausted.

TERMS—Cash with order is required. We will ship your order C. O. D. providing you send 25% of the purchase price with your order. No Discounts are allowed on C. O. D. orders.

SIZE OF ORDERS—We make an additional charge of ten cents on all orders totalling less than \$1.00 to cover packing costs.

SHIPPING SEASON—When sending us your order please indicate date which you desire shipment. If you prefer you may leave this to our judgment and we will ship your order to reach you at the best time for planting in your locality.

SATISFACTION GUARANTEED—We guarantee every plant sold by us to be exactly as represented in our catalog. We also guarantee that your plants will arrive in the best of condition. If stock should arrive in damaged condition through mishandling in transit please notify us at once. We will be glad to make a satisfactory adjustment.

INSPECTION—Our Nursery is inspected annually by an authorized nursery inspector of the New York State Department of Agriculture and an inspection tag certifying that our stock has been found free from disease accompanies each shipment.

OUR REFERENCES—The Canandaigua National Bank and Trust Co., Canandaigua, N. Y. The New York State Experiment Station, Geneva, N. Y. To those who wish to ascertain as to our reliability we suggest referring to either of the above references.

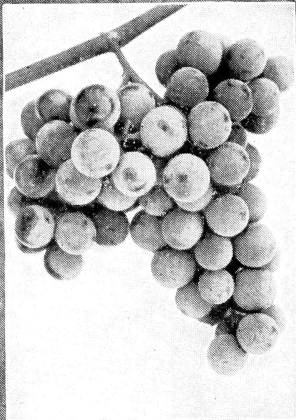

LIABILITY—We use the utmost care in keeping our stock true-to-name. However, should any plant or tree prove untrue to name we hold ourselves in readiness to replace free of charge, or to refund the purchase price, of any stock that proves untrue to label. It is agreed and understood, that we shall in no case be liable for more than the original purchase price received by us for said stock.

BUY DIRECT FROM THE GROWER—We are growers of superior quality nursery stock. You can save money and be sure of getting true-to-name stock by purchasing from a reputable grower. In this way you save by eliminating the profit usually paid to the agent or dealer.

Early* **10%**

SPECIAL CASH DISCOUNT for EARLY ORDERS

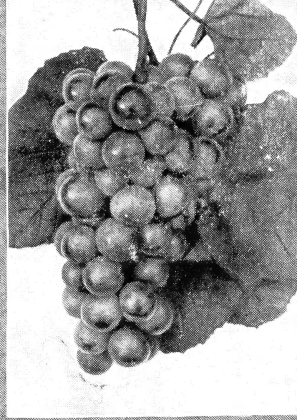

We will allow a Special Cash Discount of 10% on all cash orders received by us on or before March 5th, 1941. After this date no cash discount will be allowed. . . . BUT we will allow you to select 10% in additional stock if your order with cash in full reaches us before April 21st, 1941. The above offers apply only when the total amount of the order is \$2.50 or more.

Lucile

Plant Miller's Superior **GRAPES**

**Grown in the Famous Finger Lakes Region Where Soil and Climate
is Ideal for Growing the Best Vines**

We are in a position to supply high quality, true-to-name stock at low prices. All of our vines are propagated from cuttings taken from bearing vines in our own vineyards. We do this to maintain a high yielding strain of true-to-name stock. All of the new varieties of grapes listed are recent introductions of the New York State Experiment Station and before offering them for sale we carefully test them in our own vineyards.

Prices Listed are for Strong 2 Yr. Vines

FREDONIA—One of the best early blue grapes. Clusters are large, compact, with large berries covered with a beautiful blue bloom. Very productive, hardy, vigorous, yields larger crops than Concord. Quality good. A wonderful grape for the home garden or for commercial plantings. **Each 24c, 10 for \$1.80, 100 for \$9.00.**

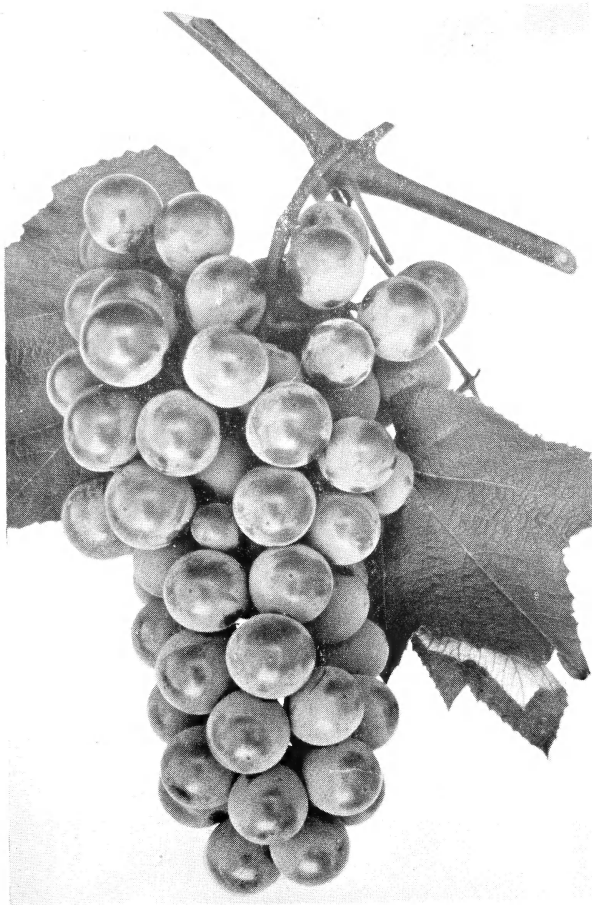

PORTLAND—A new, very early, white grape recommended for home use and roadside markets. A wonderful table grape but not suited for shipping. Vine is thrifty, hardy, and very productive. Requires close pruning. Clusters and berries large, fruit is very sweet and of good quality. **Each 23c, 10 for \$1.75, 100 for \$8.50.**

SHERIDAN—One of the best of all blue grapes. Famous for its long keeping qualities. Fruit can be kept in common storage until January 1st or later. Clusters are very large, compact. Fruit is very sweet, highly flavored, and of the best quality. Vine is vigorous, hardy, and very productive. Requires close pruning to prevent over-bearing. Ripens after Concord and should not be planted where this variety does not ripen. Recommended for the commercial grow-

er and home plantings. **Each 24c, 10 for \$1.80, 100 for \$9.00.**

ONTARIO—The earliest of all white grapes. Ripens a few days before Portland. Clusters are long, shouldered, and well formed. Fruit is of the best quality, sweet, and highly flavored. Vine is vigorous, hardy, and productive. Fruit assumes a beautiful golden color when fully matured and presents a very striking appearance. Should be included in home and commercial plantings. **Each 27c, 10 for \$2.30, 100 for \$11.00.**

SENECA—A sensational new white variety of the California-European type. The fruit characteristics are of the California type grape but has the same hardy vine qualities of our native grapes. Clusters are large, loosely formed. Berries medium, oval shaped, yellow when fully matured. Its firm, crisp berries, combined with a sweet delicious flavor, make it the very finest table grape of all. Ripens very early or a few days after Ontario, but will hang on vine for several weeks without any loss in flavor. Seneca has so many fine qualities that it should be included in every planting. Supply limited. Order early. **Each 75c, 10 for \$6.50.**

Golden Muscat

URBANA—Urbana is a handsome red grape of the California type. Clusters and berries are large and light red in color. Fruit has a sweet, crisp flavor. Keeps well in storage until late winter. Ripens late or about one week after Concord. Worthy of a trial everywhere. The handsome red fruit, combined with its unusual quality is popular with all. **Each 30c, 10 for \$2.50, 100 for \$11.50.**

Golden Muscat

The most amazing variety ever to be introduced. Clusters are of immense size, and very similar to the California grape sold in fruit stores. We have harvested clusters of Golden Muscat weighing one and one-half to two pounds. Berries are large, oval shaped, and a beautiful light gold color when fully matured. Quality equal to any white grape except Seneca. Ripens soon after Concord but needs a long growing season to attain its best quality. Vine is vigorous, hardy, and productive. Should be given a trial wherever it has a possible chance of succeeding. Our supply is limited. Order early. **Each 65c, 10 for \$6.00, 25 for \$12.50.**

WESTFIELD—A new blue grape of very recent introduction. It is in no sense a table variety but is one of the best for making wines, jellies, and grape juice. Juice of Westfield is twelve times as dark as that of Concord. Excellent for coloring wines, jellies. Clusters are medium, berries large, dark blue. Vine is vigorous, hardy, and productive. Ripens a week before Concord. **Each 30c, 10 for \$2.50, 100 for \$12.50.**

KEUKA—A new red variety of California - European parentage. Noted for high quality. Clusters are medium, compact, trim, very well formed. Berries are medium, oval, dark red, and may be eaten with the skin as California grapes. Quality is of the best, with a delicious sweet flavor. Ripens about ten days after Concord. Vine is thrifty, healthy, and productive. **Each 45c, 10 for \$3.75.**

BROCTON—One of the best new white grapes. It is hard to imagine a more delicious grape for eating out of hand. The flesh is melting, yet delicately and richly flavored. Clusters are long, tapering, well formed, and medium to large. Ripens about with Concord. Vine is hardy and moderately vigorous. **Each 45c, 10 for \$3.75.**

Van Buren

The earliest blue grape of all. Ripens a week before Fredonia. Clusters are compact, well formed. Berries medium. Quality is very good. Vine is very vigorous, hardy, and productive. We are listing this variety for the first time and know that it will be very popular when it is better known. Recommended for home plantings and for roadside markets. Supply very limited. Order early. **Each 75c, 10 for \$6.50.**

STANDARD GRAPE VARIETIES

Prices for strong, 2 yr. No. 1 vines are as follows, except where noted:

**Each 20c, 10 for \$1.60
100 \$7.50**

NIAGARA—Best known of white grapes. Large bunches and berries. Hardy, vigorous, productive. Quality good; sweet and juicy. Ripens with Concord. Popular everywhere. **Each 18c, 10 for \$1.40, 100 for \$5.50.**

CONCORD—The most widely grown commercial variety. Its place is being taken by better varieties. Still popular for grape juice and jellies. Vine is very vigorous, hardy, and productive. Quality good, clusters and berries medium. Ripens mid to late September. **Each 15c, 10 for \$1.00, 100 for \$4.50.**

BRIGHTON—A prolific red grape of very good quality. Clusters are large, shouldered, loosely formed. Berries medium. Needs several varieties planted with it for pollination as it is self-sterile. We recommend Brighton for home use and roadside markets. Ripens early.

WORDEN—A showy grape of exceptionally high quality. Fruit is very sweet and juicy. Vine vigorous, hardy, and productive. Clusters and berries are large. Ripens in late August or early September. One of the best blue grapes for the home.

DELAWARE—Clusters are medium, compact, attractive. Berries medium, light red in color. Vine very hardy and productive. Only moderately vigorous. Needs close pruning for best results. One of the best red grapes of all and should be planted in every home garden. Ripens in mid-September.

CATAWBA—Clusters large, berries medium, dark red. Quality very good. The best of all late red grapes except Keuka. Vine is vigorous, hardy, and productive. Ripens about the middle of October.

DIAMOND—A high quality white grape that is very hardy and productive. Clusters and berries are medium sized, very compact. Ripens early. An excellent table and wine variety.

LUCILE—Very productive, hardy. Never injured by extreme cold. Clusters are very large.

Berries are large, light red. Quality good. Recommended for the home garden.

DUTCHESS—Clusters are large, well formed, very firm, compact. Berries are crisp, meaty, medium sized; of the California-European type. Quality is of the very best. Ripens along with Concord. One of the best white varieties.

ISABELLA—One of the oldest blue varieties. Bunches and berries medium, vine vigorous, hardy, and productive. Ripens late. Excellent for preserves and wine making.

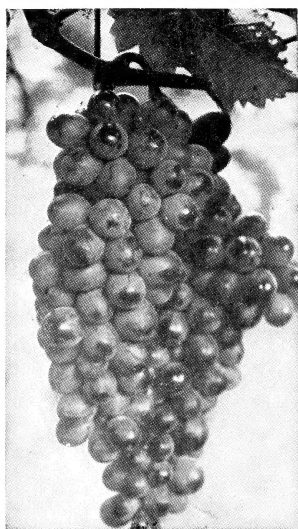

CACO—A comparatively new red grape with large red berries. Cluster is medium. Fruit is very sweet and well flavored. Vine vigorous. **Each 25c, 10 for \$2.00, 100 for \$10.00.**

CLINTON—The best variety for use as a root stock. Tests have proven that Niagara and Delaware grafted on Clinton roots have yielded 30% more fruit over a ten year period. Clusters medium, berries small, dark blue. Vine is a rank grower, hardy and productive.

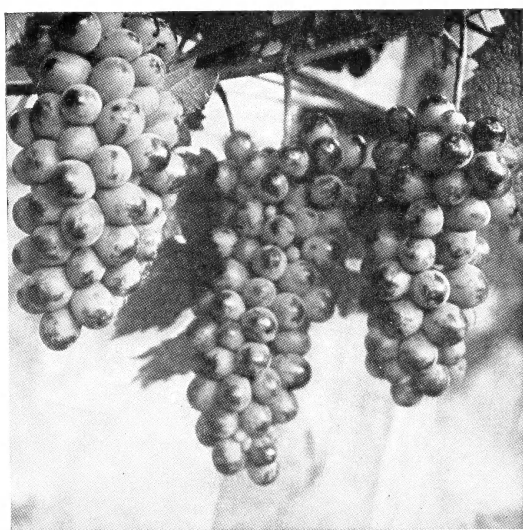

AGAWAM—Clusters and berries are large. Fruit very dark red. Quality good. Very spicy, highly flavored. Vine is vigorous, hardy, and productive. Ripens a few days after Concord.

SALEM—Very closely resembles Agawam. Clusters are more compact and berries are larger, not so spicy. Color dark red. Vine vigorous, hardy, and productive. Ripens a few days after Agawam.

IVES—A purely wine variety. Used extensively for making Port wines. Clusters are medium to large. Color dark blue. Vine is very productive, vigorous, and hardy. Ripens before Concord.

Fredonia

Grapes are the Most Healthful of All Fruits

**Here are a few reasons why
you should grow your own
Grape Supply**

Grapes are easy to grow, and succeed on a wide range of soils.

YOU DON'T HAVE TO WAIT LONG FOR YOUR VINES TO BEAR. MILLER'S VINES OFTEN BEAR THE SECOND YEAR.

We have a variety for every climate. Our new Early varieties make it possible to grow grapes anywhere.

●
**OUR NEW PRUNING INSTRUCTIONS INSURE
YOUR SUCCESS IN GROWING GRAPES**

Pruning is the most important practice of all in growing grapes successfully. We show you exactly how to do this by simple, easy-to-follow diagrams that come to you free for the asking.

Grapevines, once planted, last a lifetime.

For an arbor plant, the grapevine has no equal.

IMPORTANT

We pay the shipping costs on all vines ordered at each and ten rates. Our policy of paying the shipping charges on small orders of grapevines saves you two to three cents on every vine.

We sell five vines of one variety at ten rates. Otherwise please order at each rate. Orders of more than 50 vines are entitled to the 100 rate.

A List of Varieties for the Home Garden in the Order of Ripening

Ripening dates are for an average season in our own vineyards in Western New York.

VERY EARLY (Aug. 20-27)—Van Buren, Portland, Ontario, Seneca, Fredonia.

EARLY (Sept. 1)—Worden, Delaware, Brighton, Diamond, Lucile.

MID-SEASON (Sept. 15)—Niagara, Brocton, Westfield, Dutchess, Caco, Salem.

LATE (Sept. 25-Oct. 1)—Agawam, Golden Muscat, Sheridan.

VERY LATE (Oct. 5-15)—Catawba, Keuka, Urbana.

A List of Varieties Selected for Specific Uses

Prepared for your convenience and information

TABLE AND ROADSIDE MARKETS — Brighton, Fredonia, Keuka, Ontario, Portland, Seneca, Caco, Worden, Golden Muscat, Niagara, Lucile, Delaware, Dutchess, Brocton, Salem, Sheridan, Van Buren.

UNFERMENTED GRAPE JUICE AND JELLIES—Fredonia, Ontario, Worden, Westfield, Concord, Sheridan, Van Buren, and Catawba.

WINE—Delaware, Dutchess, Sheridan, Catawba, Westfield, Clinton, Isabella, Ontario, Ives, and Golden Muscat.

WHEN TO PLANT—For spring planting April or May is the best time to plant in our Northern states. Southern states, March or April. Grapevines may be planted successfully in the fall. November is the best month to plant when making fall plantings.

We Furnish Free Pruning and Cultural Information

In order to grow grapes successfully the vines must be pruned correctly every year. Last year we prepared special copies of our pruning instructions and included them free with each order. These were so universally popular that we are offering them again this year.

We have produced from actual photographs, mimeographed drawings of pruned and unpruned grapevines. We show, step by step, exactly how to prune vines from the time of planting up to

five years of age. The illustrations are explained in easy-to-understand terms. There are various methods of pruning grapevines but the illustrations we use are taken from our own method of pruning which we have used successfully in more than 60 years of grape culture. We include our pruning instructions free with every order of grapevines purchased from us. Also tips on cultivation, fertilizers, trellis, etc. Take advantage of this free service.

We offer the following list of fine proven varieties in their order of ripening in Western New York.

MIKADO—Very early yellow. Ripens the first week in August. Quality is very good. Tree vigorous and productive. Because of blossom sterility it should be interplanted with other varieties.

GOLDEN JUBILEE—A comparatively new peach introduced by the New Jersey Experiment Station. The amazing characteristics of this new early peach has already earned it a high rank with commercial planters and small orchardists. This large golden yellow peach is beautifully splashed with red. Flesh is tender, fine grained, juicy, and of excellent quality. Ripens about the middle of August at a time when good peaches are scarce and command a

big price. Freestone. Should be given plenty of room in the commercial orchard as the tree grows very large. Tree is very hardy. Will produce crops even after being subjected to extreme cold. We recommend this kind as one of the very best.

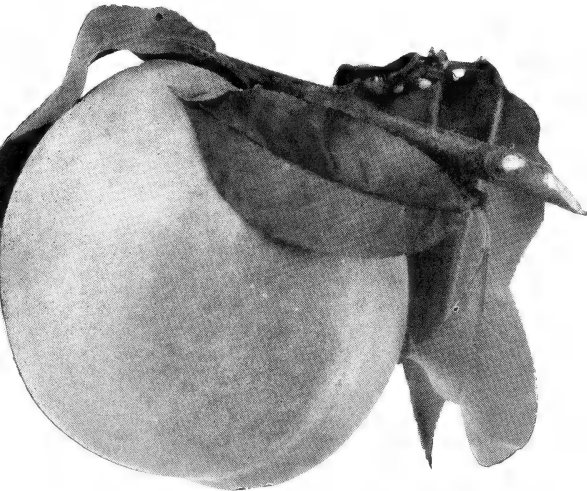

CARMAN—Large white fleshed, with beautiful red cheek. A fine quality early peach. Ripens first week in Sept. Recommended for home plantings and for roadside stand trade. Tree hardy and productive.

ROCHESTER—An early, large yellow peach with an attractive red blush. A fine canning peach. It is an early and prolific bearer, ripening in early Sept. Freestone.

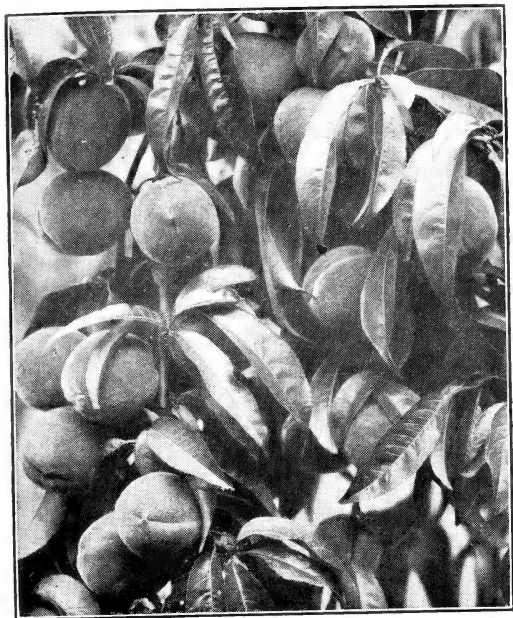

SOUTH HAVEN—A most excellent large, golden yellow peach that ranks high among the best sellers by virtue of its attractive appearance and extra fine flavor. Tree is hardy, very productive. One of the best canning peaches. Freestone.

VALIANT (New)—A large peach with a beautiful red blush. Fruit is very attractive and of good quality. Flesh tender, sweet, juicy. Tree is hardy and productive. Excellent for canning. Ripens just after South Haven. Freestone.

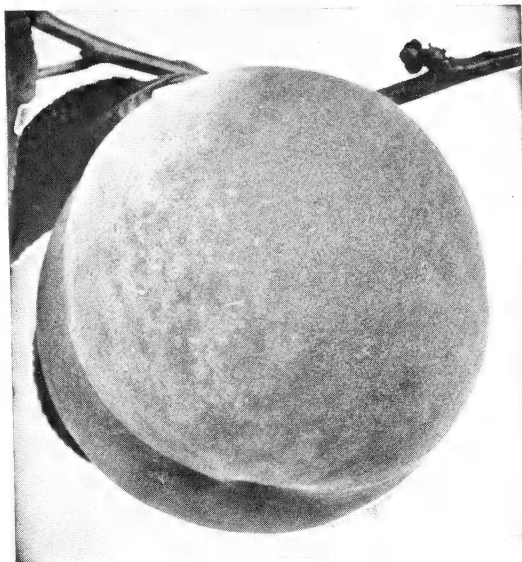

HALE HAVEN—A very promising introduction from the Michigan Experiment Station. Fruit is large, yellow, highly colored, firm, and of very good quality. Freestone. Tree vigorous and productive. Ripens about ten days ahead of Elberta. Recommended as a good commercial variety.

Hale Haven

Elberta

Valiant

BELLE OF GEORGIA—The best known white peach. Fruit is large, with showy red cheek, flesh juicy, with pleasing flavor. Tree hardy and productive. Ripens middle of Sept.

ELBERTA—One of the oldest and most popular yellow canning varieties. The most widely planted of any variety. It succeeds in a wide range of soils and climates. Fruit is attractive and good quality. Tree hardy and productive. Recommended for commercial plantings.

J. H. HALE—An extra large high quality peach that is unexcelled for canning purposes. Fruit is round and free of fuzz. Flesh is firm, golden yellow, flavor delicious. Best shipping sort. Tree hardy and productive. Needs to be interplanted with other kinds as it is self-sterile. Recommended highly for commercial and home plantings.

MILLER'S PEACH COLLECTION
(See Back Cover)

Quantities and Rates of Fruit Trees

If you order less than ten trees of one variety please remit at *each* rates. Orders of from 10 to 50 trees are subject to the ten rate with as large a selection of varieties as desired. An order of 50 or more trees entitles you to our low 100 rate. For larger quantities please write for prices.

PLANT MILLER'S

GROWN UNDER CONDITIONS

Summer Varieties

EARLY MCINTOSH—Resembles its parent McIntosh. More sprightly. A very handsome red apple. Tree vigorous, hardy, very productive. Bears annually if thinned each year. Fine quality, ripens 10 days after Yellow Transparent. This variety is a recent introduction of N. Y. Experiment Station.

YELLOW TRANSPARENT—Tree vigorous, upright, very productive. These delicious yellow apples are ready to eat long before other varieties are ready. Should be in every home orchard. Fruit ripens in mid-August.

RED ASTRACHAN—A very tart apple that is highly prized for cooking and pies. Tree vigorous, hardy, bears young. Fruit ripens a few days after Yellow Transparent. One of the best early apples.

Autumn Varieties

MILTON—An apple of the McIntosh type, ripening a month before McIntosh. Tree is vigorous, hardy and bears every year. A very beautiful red apple with a delicious, sprightly, McIntosh flavor. Introduced by the N. Y. State Experiment Station.

MCINTOSH RED—One of the most popular apples. Tree vigorous, bears young and is very hardy. Quality of the best. Delicious aromatic flavor, beautiful, large, bright red apple. Recommended for commercial and home plantings. Ripens September.

MACOUN (New)—An apple of the McIntosh type that is darker red with less stripes. The flesh and quality is the same as McIntosh. Tree is vigorous, hardy, productive. Bears annually. Recommended because of its high color and good quality. Ripens about with McIntosh.

KENDALL—Kendall is a very promising McIntosh type apple of recent introduction by the N. Y. State Experiment Station. Tree hardy, vigorous, and bears annually. It is in season with McIntosh but keeps a little longer. Handsomely covered over the entire surface a beautiful dark red color. Quality is very good.

Hardy, Northern-grown Apple Trees

THAT ARE IDEAL FOR DEVELOPING THE BEST TREES

Winter Varieties

BALDWIN—No apple has yet been found to take the place of this fine variety. Large, round, bright red, good keeping apple. Noted for its eating and cooking qualities. Ripens late Sept. Recommended for commercial plantings.

CORTLAND—An improved McIntosh ripening about two weeks later. Large, beautiful dark red, flesh melting, fine grained, juicy. A superior dessert variety. Should be included in all home and commercial plantings.

RED NORTHERN SPY—Same as Northern Spy except that fruit is darker red. One of our best known and most delicious apples. Fruit always brings a high price. Tree very vigorous and hardy. Ripens late October or early November.

RED DELICIOUS—A fine dessert variety Turns completely red before ripe. Large size, wonderful quality, has a delightful aroma, and a wonderful flavor. Ripens October. A very good variety for the home or commercial orchard.

R. I. GREENING—Noted for its fine cooking qualities. Flesh is yellow, quality good. Tree is vigorous and productive. Keeps well in storage. An important commercial variety.

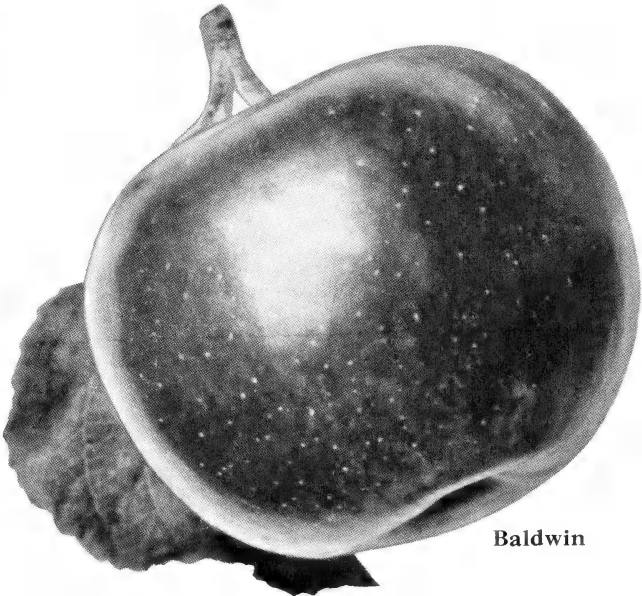

NORTHWESTERN GREENING—Tree strong, vigorous. Fruit is large, yellowish green when ripe. Good quality. In season from October to March.

RED ROME—Same as Rome Beauty except that it has a solid red color. Very productive. One of the best long keeping apples. Bears annually. Quality good. Recommended for commercial plantings.

MILLER'S BETTER CHERRIES

... we offer the best hardy varieties

Every home should have a few cherry trees. The trees grow rapidly, bear young and heavily. The fruit ranks with the best for preserves and pies and the fresh fruit is most delicious.

PRICES OF MILLER'S TRUE-TO-NAME CHERRIES

		Each	Ten	100
2 Year	5 to 7 ft.	\$.60	\$5.00	\$30.00
2 Year	4 to 5 ft.	.55	4.50	26.00

1 Year	3½ to 5 ft.	.55	4.50	26.00

SWEET CHERRIES

NAPOLEON (ROYAL ANN)—A beautiful yellow cherry with a bright red cheek. Flesh is firm, juicy, very sweet, and fine flavored. Bears heavily. An excellent canning variety. Tree is vigorous, well shaped. Recommended for commercial and home planting.

YELLOW SPANISH—One of the oldest and most popular of all sweet cherries. Tree is hardy and very prolific. A heavy bearer. Fruit large red, cheeked, meaty, firm, sweetly flavored. One of the best canning cherries. Ripens late June. Should be included in all home and orchard plantings.

SENECA—A new very early variety originated at the New York Experiment Station. The best of any early cherry. Fruit is a beautiful purple black color, with juicy melting flesh and a sweet rich flavor. Ripens first weeks in June or two weeks before Black Tartarian and finds a ready market before other kinds are ready to be harvested. Tree is vigorous and productive with an upright spreading growth. One of the best for the home orchard.

BLACK TARTARIAN—A large black meaty cherry that is well-known everywhere for its fine flavored fruit. Tree vigorous and a heavy bearer. Ripens middle to late June.

SCHMIDT'S BIGGAREAU—An extra large cherry with a deep, rich, mahogany color. Flesh dark, fine grained, tender, with a rich

pleasing flavor. Fruit grows in clusters. Tree vigorous, very productive. Ripens in July.

IMPORTANT—Cross pollination is essential with all sweet cherries. Always plant two or more kinds together to insure proper pollination. Seneca and Black Tartarian are two of the best pollinators for all sweet cherries.

SOUR CHERRIES

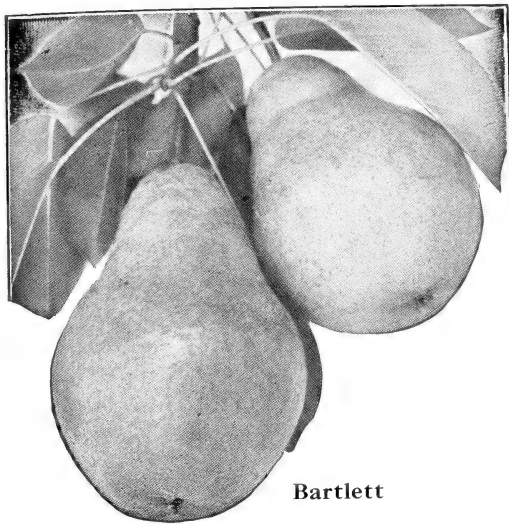

LARGE MONTMORENCY—The finest sour or pie cherry grown. The leading commercial canning cherry. The fruit is extra fine, in flavor and its brilliant red flesh is very appealing to the eye. This variety is very much in demand and brings good prices. The tree is more vigorous and productive and less subject to disease than other kinds. A heavy annual bearer. As a superior variety for making those delicious pies and preserves plant Montmorency.

EARLY RICHMOND—An old tried and true that is fine for cooking and canning. Tree is very hardy and productive. Fruit is of the best quality. Recommended for home use.

NOTE—Sour cherries are self-fruitful and do not require pollinators.

MILLER'S CHERRIES ARE NORTHERN-GROWN—GRADED TO A HIGH STANDARD

OUR TRUE-TO-NAME TREES ARE carefully packed to reach you in the best of condition.

without some of these
fine trees***

BEURRE BOSCH—A large gourd shaped pear, russet bronze in color. Quality of the best, sweet, rich, fine flavored. One of the best long keeping varieties. Tree is productive, ripens late Sept.

ANJOU—A large yellow pear. Symmetrical, quality good. Tree very vigorous, productive. Known as one of the best long keeping winter pears. An excellent pollinator.

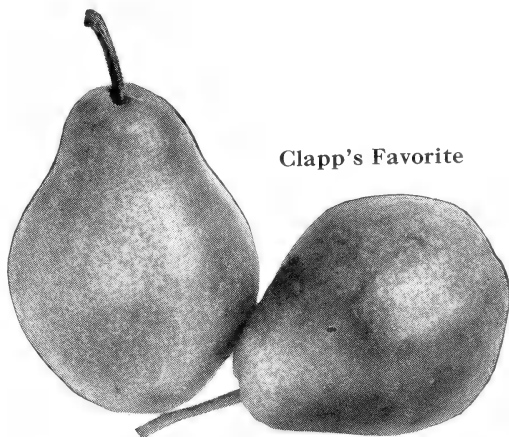

Cross pollination is necessary in the successful culture of pears. In order to grow large crops, plant several varieties. Bartlett and Seckel will not pollinate each other but any of the others listed above are very good.

Our list of varieties includes only those of proven merit that are of commercial importance.

BARTLETT—This pear is known far and wide for its large, juicy, golden, delicious fruit. The most popular of all pear varieties. Unexcelled for canning. Tree is thrifty and very productive. Ripens early September.

SECKEL—A small pear that is perhaps the most delicious of all pears. The fruit has a greenish yellow flesh, beautifully splashed a coppery red. When fully ripe turns a golden brown, and is exceptionally sweet and juicy. Tree upright in growth, hardy, and very productive. Ripens about one week after Bartlett.

CLAPP'S FAVORITE—An unusually large pear with a very appealing yellow color with a red cheek. Flesh is juicy, fine textured, sweet, aromatic flavor. Tree is hard and a good bearer. Ripens late August or early September. One of the best early pears.

Clapp's Favorite

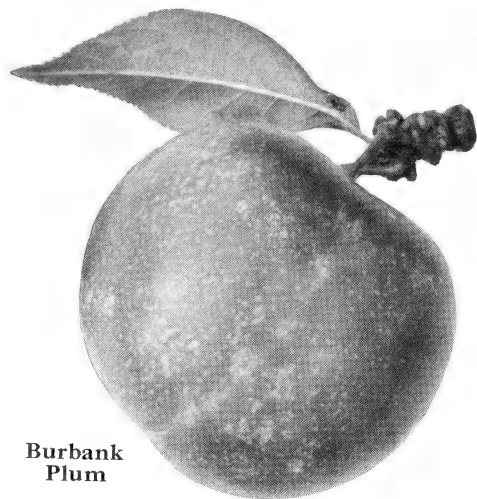

MILLER'S APRICOTS

Apricots are a delicious and tasty fruit. They ripen between cherries and peaches at a time when other tree fruits are scarce. The fruit is always in great demand for local markets and home use. Trees grow best on rich, deep soil that is well drained.

(Not Prepaid)			PRICES OF APRICOTS		(Less Discount)	
					Each	Ten
1 Year	Large	4 to 5 ft.			\$.60	\$5.00
1 Year	Medium	3 to 4 ft.50	4.00

HARRIS—A medium sized English variety, oblong, with meaty, orange flesh of good quality. Hardy in New York State. Prolific. Tree productive. Best early variety. Ripens Middle of July.

MOORPARK—A very large attractive apricot with a red cheek. Best quality and richest flavor of all Apricots. Tree hardy and productive. Ripens early August. Recommended for home use and roadside markets.

Burbank
Plum

PLANT MILLER'S PLUMS

Recommended varieties for real satisfaction!

Commercial plum growing in the Eastern States has been on the wane chiefly because there are too few good varieties. There is big demand and a good outlet for the better varieties of plums. Very few plum trees have been planted in the last 20 years. Consequently the supply of this fine fruit is very limited. The better varieties of plums are of excellent quality, attractive, and grow well on a wide range of soils.

(Not Prepaid)		PRICES OF PLUM AND PRUNE TREES			(Less Discount)		
			Each		Ten		100
2 Year	5 to 7 ft.	\$.60		\$5.00		\$35.00
2 Year	4 to 5 ft.55		4.50		30.00
2 Year	3 to 4 ft.50		4.00		25.00
1 Year	3½ to 5 ft.55		4.50		30.00

The Following Varieties are Recommended by the New York State Experiment Station

SHROPSHIRE DAMSON (European)—Purplish black with heavy blue bloom. Medium sized. One of the best kinds for making preserves. Tree is very hardy and vigorous. Bears huge crops annually. Ripens early September. One of the most profitable commercial varieties.

ABUNDANCE (Japanese)—A medium sized red plum with yellow flesh that is sweet and juicy. Ripens in August. A good early plum for home use. Tree is hardy and very productive.

BURBANK (Japanese)—Fruit is large and of a rich dark red. Skin is thin, covered with a

heavy bloom, flesh is yellow, juicy, tender, and sweet. The tree is so productive it requires thinning. Grows large, spreading tree. Season is late August. Recommended for home use.

REINE CLAUDE (European)—One of the best late plums. In season the last of September. Tree medium-sized, hardy, and productive. Bears good crops annually. Fruit roundish-oval, streaked with green, with a red blush. Quality very good, juicy, firm, sweet, yellow fleshed. Recommended for home use.

MILLER'S PLUM TREES ARE LARGE, STURDY, GUARANTEED TO PLEASE

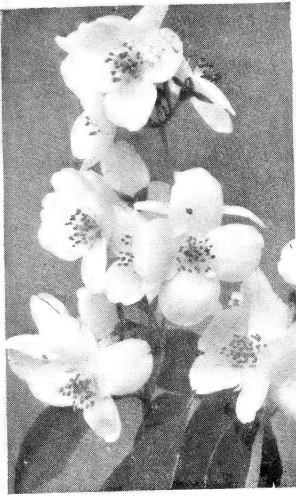

MILLER'S PRUNES

STANLEY—This prune introduced by the New York State Exp. Station is fast becoming popular because of its many fine qualities. Fruit is large, typically prune shaped, bluish purple covered with a thick bloom. Flesh yellow, juicy, fine grained, tender, and sweet. Tree is large, spreading, upright, very vigorous, and productive. Tree bears young. Recommended highly for commercial plantings and for home use. Ripens early September.

FELLEMBURG (Italian Prune)—The most widely known prune. Fruit is large, oval,

purplish blue with a heavy bloom. Very handsome and showy. Flesh is yellow when fully ripe, juicy, firm, sweet, fine flavored. A delicious prune for eating out of hand, canning, and preserves. One of the best commercial prunes as well as being unsurpassed for home use. Tree vigorous, spreading, hardy, very productive. Ripens from mid- to late-September.

POLLINATION—The prunes, Fellemburg and Stanley do not require pollinators. Other varieties of plums require two or more kinds interplanted as pollinators.

Sweet Mockorange

HARDY FLOWERING SHRUBS for all season's bloom

PRICES FOR STURDY 2 TO 3 FT. SHRUBS

(Except as Noted)

35c Each, 4 for \$1.25, 10 for \$3.00

(All Prices Subject to Discount, See Page 2)

ALMOND (*Prunus Glandulosa*)—An erect growing shrub reaching a height of 4 to 5 feet. Covered with beautiful double pink blossoms in May. Adds delicate beauty to any home.

BARBERRY THUNBERGI—A low growing plant that makes the best all purpose hedge. Beautiful bright green foliage changing to a brilliant red in autumn. Its bright red berries are attractively conspicuous throughout the winter. Grows well in shady places and is not injured by severe winter temperatures.

	Ten	100
Prices: 15 to 18 inches	\$1.60	\$14.00
18 to 24 inches	1.80	16.00

PRIVET, AMUR RIVER—The hardiest of all Privets. The one to plant where winters are severe. Makes a beautiful even hedge.

	Ten	100
Prices: 18 to 24 inches	\$1.10	\$ 7.00
2 to 3 ft	1.40	10.00

PRIVET, CALIFORNIA—Leaves glossy green. The most widely used of all hedge plants. Close growing. Most satisfactory for shearing.

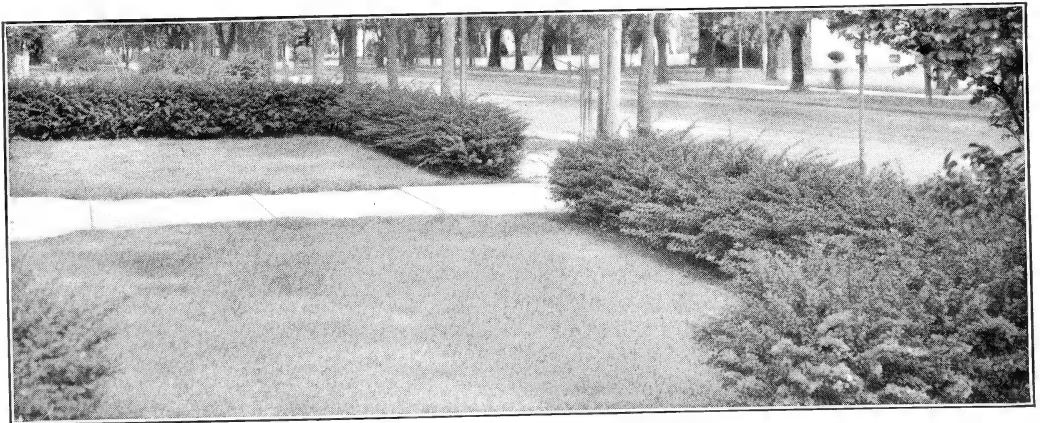

Prices: Strong, sturdy 2 yr. plants 2 to 3 ft. Ten for \$1.00, 25 for \$2.00, 100 for \$6.00.

RED LEAVED BARBERRY—Outstanding in any location because of its brilliant red foliage. It retains its gorgeous coloring throughout summer and fall. Bright red berries cling to plants all winter. Needs a sunny spot for best results. Grows 3 to 4 ft.

CORNUS STOLONIFERA (Red Twig Dogwood)—Has clusters of dainty white flowers followed by white berries. Branches turn blood red in winter. Grows 6-8 ft.

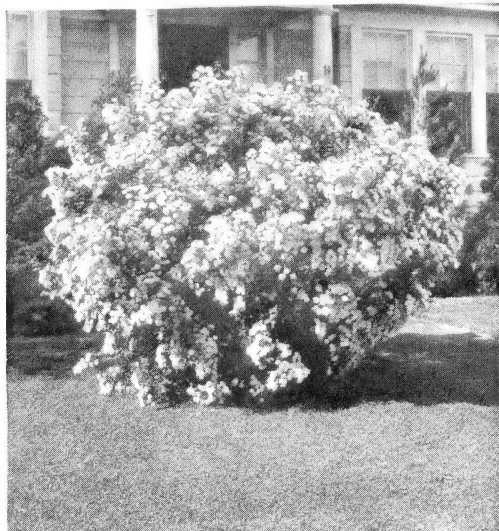

CORNUS ELEGANTISSIMA (Variegated Dogwood)—Similar to Red Twigged except leaves are green with a white stripe. A beautiful shrub for group planting. Strong 2 yr. plants. 60c each.

Barberry Thunbergi

Add New Beauty to Your Home with MILLER'S FLOWERING SHRUBS

Spiraea Van Houttei

FORSYTHIA (Golden Bell)—There is nothing more beautiful than the gay, yellow bloom of this early blossoming shrub. Grows 6 to 8 ft.

HYDRANGEA ARBORESCENS (Hills of Snow)—A familiar but always beautiful sight with its great round white flower heads in late summer. Very showy. Late July to September. Grows to 4 ft.

HYDRANGEA P. G.—A most beautiful shrub that commands attention everywhere. Large blooms sometimes a foot in length. Pure white at first changing to pink and then bronze. Does well in partial shade. Grows 4 to 5 feet.

LILAC (Common Purple)—The grand old variety whose purple blooms fill the air with such sweet fragrance in May. No home garden is complete without at least one bush. Makes excellent screen. Grows 10-12 ft.

MOCKORANGE, SWEET SCENTED (Philadelphus Coronarius)—One of the older varieties but still one of the best. Flowers are pure white, deliciously fragrant, and borne in great abundance. Blooms in May and June. 6 to 8 feet.

MOCKORANGE, VIRGINAL (Philadelphus)—Medium height, beautiful double white flowers in large clusters throughout the summer. Very fragrant. One of the best. Grows 5 to 6 ft.

SPIRAEA, ANTHONY WATERER—Beautiful dense foliage, of dark color. Produces an abundance of striking crimson flowers during July and August. Grows to about 2 feet. A fine low border and foundation plant. Available only in 18 to 24 inch size.

SPIRAEA, VAN HOUTTEI—The most popular of all Spiraeas. Noted for its beautiful foliage, lovely white flowers, and graceful bearing. A fine hedge plant. Produces masses of white bloom in May and June.

	Each	10
Prices: 1½ to 2 ft.	\$.19	\$1.40
2 to 3 ft.24	2.00

WEIGELIA, ROSEA—One of the choicest of all shrubs. The beautiful, bell shaped flowers are borne in great profusion. Color rosy pink, very fragrant. July. Grows to 6 feet.

JAPAN QUINCE (Cydonia Japonica)—Completely covered with masses of scarlet, crimson flowers, followed by small quince shaped fruits. Early May.

IMPORTANT—Some of our flowering shrubs are spring dug and can not be shipped until the ground thaws. This is usually about April 1st to 10th.
